

Case Study Template

Certificate in Fluoride Varnish Application — DNT

Learner name	
GDC number	
Case study number	Case 1 of 2 / Case 2 of 2 (circle)
Date of application	

Instructions

Complete two case studies in total. Each case study should be based on a real supervised application from your logbook. Anonymise all patient details in line with GDPR — do not include the patient's name, date of birth or any other identifying information. Word count: there is no set word count but responses should be thorough and demonstrate genuine reflection.

1. Patient Background

Include: approximate age, patient group (pre-school / child / teenager / adult / elderly), relevant medical and dental history, presenting reason for the appointment. Anonymise all identifying details.

2. Caries Risk Assessment

What factors placed this patient at caries risk? What assessment was carried out? Why was fluoride varnish application indicated for this patient?

3. Full Treatment Plan

Describe the overall treatment plan for this patient — not just the fluoride application but all planned treatment of which it forms a part. Include preventive, restorative and any other planned interventions.

4. Consent Process

How did you obtain consent for this patient? Who gave consent? What did you explain to the patient or parent/carer? Were there any challenges with consent and how did you manage them?

5. Step-by-Step Application

Describe what you did during the application: product used, concentration, surfaces treated, isolation technique, any adaptations made for this patient, and how you maintained IPC throughout.

6. Challenges

Describe any challenges you encountered during the appointment — for example: patient behaviour, moisture control, time management, communication difficulties. How did you manage them?

7. Aftercare and Communication

What aftercare advice did you give and how? How did you adapt your communication to this patient? What follow-up is planned?

8. What Went Well

9. What You Would Improve

10. Personal Reflection

What did you learn from this case? How has it developed your practice? What would you do differently next time?
